

**LEAP**

## **What is the Lifetime Economic Acceleration Process?**

The **LEAP** system is a process designed to make money decisions that utilize the efficient and effective flow of money between assets to obtain increased benefits and/or money supply.

It truly focuses on the efficient and effective use of each dollar in order to create its maximum utility and build additional wealth.

The LEAP process seeks to lower the risk in a person's overall financial plan and help provide more protection against factors that can erode wealth.

Through the combination of four to six meetings which include conversations about your unique situation, problem identification, and strategy meetings you will find we can help improve your plan. With a small commitment of time the LEAP process helps bring peace of mind and security to your financial future.
